

## Receiver MarConnecti-Stick

### Features

#### Product features:

Measurement without the nuisance of additional modules: Unlike conventional wireless solutions, which have a large external transmitter with separate battery, the transmitter in Integrated Wireless is fully integrated.

Highly mobile: Integrated Wireless gives you much more mobility. There is no cable to get in the way, either at the measuring station or when measuring on or at the machine or at large workpieces

Easy data transfer: With Integrated Wireless you can transfer your measured values to the PC simply using the iStick. As with a data cable, the measured values are accepted via the MarCom software directly into MS Excel© or via a keyboard code into any Windows application

Reliable transfer: With Integrated Wireless you can be sure that your data will arrive safely. Measuring instruments with Integrated Wireless display messages to confirm whether the transmitted data has been correctly transferred or whether you are within receiving range of the iStick receiver

Long battery life: The integrated wireless interface makes the measuring instrument exceptionally energy-efficient. And unlike conventional wireless systems, no additional battery is required

Affordable: With Integrated Wireless you can connect up to 8 measuring instruments per iStick receiver. Expensive interface boxes are no longer necessary. With even one connected measuring instrument you get a wireless connection for the price of a cable

#### Scope of delivery:

- Software MarCom Standard
- i-stick wireless receiver
- Driver

Order-No.: 4102220

### Technical Data

<b>Frequency band</b>	2400 MHz
<b>Number of channels</b>	3
<b>Radio range</b>	up to 6 m
<b>Data interface</b>	USB
<b>Hardware interfaces</b>	USB
<b>System requirements:</b>	IBM AT compatible PC, CD- / DVD-drive, MS Excel from version 97 onwards, MS Windows 7, USB-interface from version 1.1, minimum 10 MB free hard disk space
<b>Product weight</b>	0,1 kg
