MANOSKOP® 714

Electromechanical angle-controlled torque wrench

PRECIMER

Made in Germany

STAHLWILLE®

MANOSKOP® 714

HIGH-DEFINITION.

High-definition graphical colour display with additional side-mounted indicator lamps.

HIGH-GRADE.

Durable quality – Made in Germany.

ACCURATE.

Display deviation value ± 2 % for torque and ± 1 % for angle.

FAST.

Fast, accurate setting via keypad.

MULTISENSORY.

Tactile and acoustic trigger signals. Electro-mechanical click function.

PROTECTED.

Own ident number can be stored in the wrench.

LOGGING.

Up to 200 joints can be programmed in up to 25 sequences.

CONFIGURABLE.

Includes SENSOMASTER software for easy configuration of the tool. Enables joints and work sequences to be configured and managed easily and quickly.

Additional benefits:

- **Micro USB interface** for a high number (10.000) of mating cycles.
- Indicator lamps clearly visible from all sides.
- **Optional extras:** Li-Ionen battery No 7195-2 and charger No 7160.

PREVIEW

BENEFITS AT A GLANCE

- Indicating and click-type
- 4 measuring methods (torque, angle, torque backed up by angle, angle backed up by torque)
- Freely configurable menu structure
- Includes SENSOMASTER software for easy configuration of the tool
- 3 function modes: click-type, peak (indicating mode displaying peak reading) and track (indicating mode displaying current value)
- Angle-controlled measurement without a reference arm
- Data storage (≤ 2,500 tightening jobs)
- Acoustic and visual assessment of the joint
- Clockwise and anticlockwise tightening
- Tactile and acoustic trigger signals
- Torque and angle are simultaneously visible
- All readings are independent of the point of application of force with sizes 1, 2 and 4
- Patented
- Display deviation value ± 2% for torque and ± 1 % for angle

Fully-automated calibration and adjustment of torque and angle using the perfectControl calibrating unit No 7794-3.
